Summary

AI Engineer building production LLM and agent systems across Python and TypeScript. Experienced in RAG, agent orchestration, retrieval, tool use, model evaluation, and AI product development using FastAPI, LangGraph, Qdrant, PostgreSQL, and modern LLM APIs. Shipped AI systems used by real users, with hands-on experience in security and SOC 2 / HIPAA compliance readiness.

Experience

BrainBoxAutomations

September 2025 – Present

AI Engineer

- Built **Kimport AI Sales Assistant**, monitoring 4 Gmail inboxes and generating contextual reply drafts using hybrid retrieval (BM25 + Qdrant) and Gemini/Claude.
- Developed a production RAG microservice with FastAPI and a 4-node LangGraph workflow (classification → routing → retrieval → generation), using LaBSE embeddings, Qdrant, and Docling for PDF, TXT, and PPTX ingestion.
- Embedded 600+ documents in Qdrant and stress-tested the system for 150 concurrent users before deploying to production with 75+ active beta users.

Luminogics

January 2025 – October 2025

AI Engineer

- Fine-tuned **LLaMA 3 8B** on 10K Alpaca samples using supervised PEFT with Hugging Face Transformers on dual T4 GPUs, adapting it for instruct-style assistant behavior.
- Built an LLM-powered **financial analysis system** with FastAPI for revenue, cash flow, debt, and risk analysis.
- Developed an **agentic summarization system** for large-scale medical documents exceeding 1,000 pages.

Octopus Digital Ltd.

July 2024 – December 2024

Trainee Software Engineer

- Developed a GenAI application for ad-hoc data analysis, including time-series forecasting and Azure OpenAI integration.
- Built a **Document QA system** using Azure OpenAI with document citations and page-level references.

Selected Projects

Ember – Enterprise AI Agent Platform | Python, TypeScript, FastAPI, Next.js, PostgreSQL, Redis, OpenSearch

- Contributing to a governed AI-agent platform with persistent agents, evidence-backed retrieval, agent evaluation, and regression tooling.
- Driving dependency auditing and security hardening for SOC 2 / HIPAA compliance readiness across the monorepo.

Kimport AI Sales Assistant | Python, FastAPI, Qdrant, Gemini, Claude, GCP

- Built an AI sales automation system for **4 sales employees + 1 executive**, monitoring Gmail inboxes and generating contextual reply drafts using hybrid retrieval and Gemini/Claude.
- Built an evaluation and analytics pipeline tracking draft adoption, response times, activity classification, and conversion outcomes, with automated stalled-client detection.
- Developed a lightweight executive chat interface for natural-language sales analytics using FastAPI and Google Sheets.

Anti-Fragility Coach – Multi-Modal RAG System | Python, FastAPI, Gemini, Claude, Qdrant, Amazon EC2

- Developed a multi-modal RAG coaching system using Gemini and Claude, hosted on Amazon EC2.
- Embedded **600+ documents** in Qdrant using gemini-embedding-001 for context-aware recommendations.
- Stress-tested the system for **150 concurrent users** and deployed to production with **75+ active beta users**, iterating on response relevance and tone from user feedback.

MedLegal Document Summarization System | Python, Azure OpenAI, Azure Custom Document Classifier

- Built a MedLegal document summarization system that condensed **1,000+** page medical files into 40-page summaries, automating document segmentation and summarization for complex medico-legal documents.

Education

National University of Computer and Emerging Sciences

Bachelor of Science in Computer Science

- Dean's List of Honor – Fall 2023

Lahore, Punjab

June 2024

Technical Skills

Languages: Python, TypeScript, SQL

AI / ML: LLMs, RAG, AI Agents, Fine-Tuning, PEFT, NLP, Information Retrieval, Model Evaluation

Frameworks: FastAPI, LangGraph, Next.js, PyTorch, Hugging Face Transformers, Flask

LLM Platforms: Gemini, Claude, OpenAI, Azure OpenAI, DeepSeek

Databases / Search: PostgreSQL, Qdrant, Redis, OpenSearch

Cloud / Infrastructure: Amazon EC2, GCP, Azure (Function App, Web App), Docker, Vercel

Tools: Docling, LaBSE, Make.com, Google Sheets API, OpenRouter

Certifications

Microsoft Certified: Azure AI Engineer Associate (AI-102)

Hugging Face: AI Agents Fundamentals
